### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The claims are allowable over the prior art of record because the prior art does not teach or suggest a toner supply container detachably mountable to an image forming apparatus, said toner supply container comprising a container body for containing toner; a shutter for closing and opening an opening which is provided in said container body, said shutter including a first gear portion for meshing engagement with a first gear member, which is provided in the image forming apparatus; a rotatable member, which is rotatable relative to a main body of said toner supply container to produce a driving force for opening and closing said shutter, said rotatable member including a second gear portion for meshing engagement with a second gear member, which is provided in the image forming apparatus, said first gear member and said second gear member being rotatable together; and a projection, which is provided on said rotatable member, for receiving a force for pre-rotating said rotatable member through a predetermined angle in a direction of opening said shutter, from the image forming apparatus in response to a mounting operation of said toner supply container to the image forming apparatus, wherein said rotatable member is rotatable through a predetermined angle in a direction of closing said shutter from a position at which said first gear portion is in meshing engagement with the first gear member, and wherein said projection enables disengagement between said first gear portion and the second gear member so as to substantially prevent said second gear portion from rotating the second gear member in a dismounting operation of said toner supply container from the image forming apparatus.
